

VeldoraHaven Growth Operating System

September 2026 → March 2027

Version: 1.0

Start: 1 September 2026

Review horizon: 1 March 2027

Execution model: Autonomous AI-assisted growth operation

Primary operator: Claude / VeldoraHaven Agent System

Human approval: Required for irreversible, financial, contractual, publishing, outreach-send, advertising-spend, supplier, or production-store actions.

1. NORTH STAR

VeldoraHaven will evolve from a premium outdoor-sauna webshop into a curated European premium outdoor-living retailer.

The objective is not maximum SKU count.

The objective is to become a trusted destination for high-value outdoor living projects across:

- Outdoor saunas
- Outdoor kitchens
- Fire features
- Cold-water / wellness experiences
- Premium outdoor furniture
- Pergolas and architectural outdoor environments

Positioning:

Outdoor Living, Elevated.

VeldoraHaven should feel closer to a premium architectural/interior brand than a conventional ecommerce store.

2. COMMERCIAL MODEL

Primary commercial characteristics:

- High average order value
- High gross-profit potential per transaction
- Low order volume required to build meaningful revenue
- Premium European manufacturers
- Supplier/direct-delivery model where appropriate

- Consumer ecommerce + assisted high-ticket sales
- Future B2B/specifier channel
- European expansion potential

Do NOT optimize VeldoraHaven like a mass-market ecommerce store.

Optimize for:

1. qualified traffic
 2. trust
 3. high-intent leads
 4. high-value transactions
 5. project value
 6. gross profit
 7. repeat/referral/specifier distribution
-

3. 12-MONTH COMMERCIAL TARGET

Initial targets, subject to revision when sufficient real-world data exists.

Base case

€500,000–€750,000 annualized revenue.

Strong case

€1,000,000–€1,500,000 annualized revenue.

Excellent case

€2,000,000+ annualized revenue.

These are targets, not forecasts.

Claude must never report targets as achieved performance.

4. CORE GROWTH LOOPS

Growth work is divided into seven engines.

ENGINE A — PRODUCT & SUPPLIER EXPANSION

Objective:

Increase credible premium assortment without destroying curation.

Priority:

1. Auroom — existing core sauna supplier
2. Röshults — current incoming product expansion
3. EcoSmart Fire — partnership target currently under discussion
4. Gloster — later furniture partnership target
5. Additional suppliers only when strategically justified

Rule:

Do not add suppliers merely to increase SKU count.

Each supplier must strengthen at least one of:

- brand authority
- category coverage
- gross profit
- search demand
- project value
- cross-sell potential

5. ENGINE B — CONVERSION & TRUST

The website must answer the question:

Why should someone trust VeldoraHaven with a €5,000–€30,000 purchase?

Required trust architecture:

- manufacturer relationships
- warranties
- delivery process
- shipping expectations
- product specifications
- payment security
- company information
- contact options
- FAQs
- installation information
- authentic reviews when available
- project/customer imagery when available
- clear returns/cancellation information
- transparent lead times

Never fabricate:

- reviews
- testimonials
- customer numbers

- projects
 - partnerships
 - certifications
 - awards
 - delivery claims
-

6. ENGINE C — ORGANIC SEARCH

Build topical authority rather than AI-generated content volume.

Primary content clusters:

Sauna

- outdoor sauna
- barrel sauna
- square barrel sauna
- outdoor sauna Denmark
- outdoor sauna Europe
- sauna cost
- barrel vs cabin sauna
- Thermowood
- sauna foundation
- electrical requirements
- heater sizing
- electric vs wood-fired
- sauna maintenance
- winter sauna
- Auroom guides
- model comparisons

Outdoor Kitchens

- premium outdoor kitchen
- Scandinavian outdoor kitchen
- modular outdoor kitchen
- outdoor kitchen planning
- stainless steel outdoor kitchen
- Röshults guides
- outdoor kitchen dimensions
- outdoor kitchen maintenance

Fire

Once products are commercially available:

- outdoor fire pit
- bioethanol fire

- fire table
- outdoor fireplace
- fire feature design
- EcoSmart guides

Outdoor Wellness

- Nordic wellness
- sauna + cold plunge
- home wellness garden
- outdoor spa design
- Scandinavian garden wellness

Every commercial content cluster should naturally connect:

INFORMATION

→ CATEGORY

→ PRODUCT

→ PROJECT / PURCHASE

7. ENGINE D — SOCIAL CONTENT

Social media is not a product catalogue.

It is a premium outdoor-living media channel.

Content Pillar 1 — ASPIRATION

Examples:

- Nordic dusk
- sauna steam
- fire
- architecture
- snow
- warm wood
- outdoor cooking
- garden transformation
- wellness rituals

Purpose:

Create desire.

Content Pillar 2 — EDUCATION

Examples:

- 3 mistakes when buying an outdoor sauna
- Barrel vs square barrel sauna
- What does a premium sauna actually cost?
- Why Thermowood?
- What heater size do you need?
- How should a sauna foundation be prepared?
- What makes a premium outdoor kitchen different?

Purpose:

Build authority.

Content Pillar 3 — PRODUCT STORIES

Do not produce generic:

BUY NOW.

Instead:

Explain:

- design
- material
- origin
- use case
- craftsmanship
- environment
- engineering
- lifestyle

Purpose:

Convert attention into product interest.

Content Pillar 4 — DESIGN INSPIRATION

Create:

- outdoor wellness concepts
- garden layouts
- architectural inspiration
- sauna environments

- outdoor kitchen environments
- fire environments

Purpose:

Pinterest, Instagram and organic discovery.

Content Pillar 5 — BRAND

Show:

- VeldoraHaven philosophy
- supplier selection
- why specific products were chosen
- product research
- design principles
- behind the scenes
- European/Nordic outdoor living

Purpose:

Make VeldoraHaven itself valuable.

8. SOCIAL CADENCE TARGET

Target cadence once the production system is operational:

Instagram: 4–5 posts/reels per week

TikTok: 4–7 videos per week

Pinterest: 5–15 pins per day through scheduled/reused assets

YouTube Shorts: 3 per week

YouTube: 2 useful long-form videos per month

Journal: 2–4 substantial pieces per month

Email: 2 campaigns per month initially

Do NOT sacrifice quality merely to satisfy cadence.

One strong creative asset should be repurposed across channels where appropriate.

9. ENGINE E — B2B / TRADE

This is a strategic growth channel.

Target organizations:

- architects
- landscape architects
- garden designers
- luxury home builders
- pool companies
- property developers
- boutique hotels
- wellness resorts
- spa consultants
- premium glamping operators
- hospitality developers

Target contacts:

- Founder
- Partner
- Principal Architect
- Landscape Architect
- Design Director
- Procurement
- Development Director
- Project Director

10. VELDORAHAVEN TRADE PROGRAM

Build:

/trade

Positioning:

Outdoor living, specified for your project.

Potential trade offering:

- project quotations
- trade pricing where commercially approved
- product specifications
- CAD/specification material where manufacturers permit
- dimensions
- lead times
- delivery coordination

- manufacturer liaison
- product selection support
- warranty coordination
- dedicated project contact

Never promise benefits not commercially approved.

11. OUTREACH SYSTEM

Initial target:

50–100 highly qualified organizations per week.

Quality over volume.

Do not mass scrape random companies.

Each prospect should have:

- organization
- country
- website
- category
- relevant contact
- role
- verified email when available
- LinkedIn
- reason for fit
- relevant projects
- VeldoraHaven opportunity
- personalization angle
- outreach status
- follow-up date

Never guess an email.

12. OUTREACH SEQUENCE

Recommended initial sequence:

DAY 0

Personalized introduction.

DAY 4–5

Short follow-up with useful context.

DAY 10-14
Final useful follow-up.

Stop after sequence unless engagement occurs.

Do not create aggressive automated spam.

13. OUTREACH MESSAGE PRINCIPLE

Never lead with:

Would you like to buy a sauna?

Lead with project relevance.

Example positioning:

VeldoraHaven sources premium European outdoor-living products for residential, landscape and hospitality projects.

Relevant categories include premium outdoor saunas, kitchens, fire features and future complementary outdoor-living products.

The objective is to become useful to the specifier before attempting to sell a product.

14. ENGINE F — PAID ACQUISITION

Do not scale paid media before measurement and conversion infrastructure is verified.

Initial priority:

Google Search

Focus on high-intent queries.

Examples:

- outdoor sauna Denmark
- premium outdoor sauna
- barrel sauna Denmark
- Auroom sauna
- outdoor sauna Europe
- Röshults outdoor kitchen
- Röshults kitchen
- premium outdoor kitchen

Brand/product campaigns should be separated where practical.

Measure:

- search terms
- CPC
- qualified visits
- leads
- add-to-cart
- checkout
- purchases
- revenue
- gross profit
- ROAS
- CAC

Revenue alone is insufficient.

Gross-profit-adjusted acquisition should eventually become the decision metric.

15. META

Meta initially functions primarily as:

- retargeting
- creative testing
- brand discovery
- visual demand creation

Do not immediately deploy broad large-budget campaigns.

Build creative evidence first.

16. ENGINE G — EMAIL / CRM

Capture users who are interested but not ready for a €5k–€30k purchase today.

Flows to build:

- welcome
- product interest
- abandoned cart
- abandoned checkout
- high-value browsing
- educational nurture
- post-purchase
- review request

- cross-sell
- project follow-up

Segment by interest:

SAUNA

OUTDOOR KITCHEN

FIRE

WELLNESS

TRADE

Do not send identical communication to every segment.

17. PROJECT VALUE STRATEGY

Move beyond individual products.

Future commercial concepts:

Sauna Package

Sauna

- heater
- stones
- controller
- accessories
- delivery

Nordic Wellness Package

Sauna

- cold-water experience
- accessories

Outdoor Kitchen Environment

Kitchen modules

- cooking components
- accessories

Complete Outdoor Living

Sauna

- kitchen
- fire
- furniture

Bundles must only be created after pricing, logistics, compatibility and supplier terms are verified.

18. PHASE 1

SEPTEMBER 2026 — COMMERCIAL FOUNDATION

Primary objective:

Make VeldoraHaven commercially ready for systematic acquisition.

P1.1 Product completion

- Finish current Auroom product architecture
- Resolve remaining product/data blockers
- Complete Röshults launch preparation
- Verify pricing
- Verify imagery
- Verify specifications
- Verify shipping
- Verify collections
- Verify SEO metadata

P1.2 Supplier

- Progress Röshults commercial integration
- Progress EcoSmart Fire discussions
- Record exact partnership status
- Never describe prospective partnerships as confirmed

P1.3 Measurement

Audit/implement:

- GA4
- Google Search Console
- Google Merchant Center
- Google Ads conversion tracking
- Meta Pixel
- Shopify conversion events
- UTM convention

P1.4 Trust

Audit and improve:

- delivery
- warranty
- returns
- contact
- FAQ
- payment
- product specifications
- company identity
- partner representation

P1.5 Trade

Create `/trade` .

Create:

`TRADE-PROGRAM.md`

`TRADE-PROSPECTS.csv`

`TRADE-OUTREACH.md`

SEPTEMBER EXIT CRITERIA

VeldoraHaven is ready to receive systematic qualified traffic.

19. PHASE 2

OCTOBER 2026 — ACQUISITION LAUNCH

Launch:

- Google Search
- organic social system
- Pinterest
- first SEO cluster
- first B2B outreach batch
- email capture
- retargeting audiences

Target:

300 qualified B2B prospects researched cumulatively.

Publish first repeatable social cadence.

Begin weekly acquisition reporting.

20. PHASE 3

NOVEMBER 2026 — VALIDATION

Determine what actually produces:

- qualified traffic
- leads
- carts
- purchases
- gross profit

Expand:

- best Google campaigns
- strongest content formats
- SEO pages generating impressions
- outreach segments generating replies
- supplier/product categories generating interest

Kill or revise weak experiments.

Do not protect experiments because effort was spent creating them.

21. PHASE 4

DECEMBER 2026 — CONVERSION

Focus:

- PDP conversion
- trust
- product comparison
- bundles
- email
- retargeting
- assisted purchasing
- high-intent lead capture

Analyze:

Traffic → product → intent → checkout → sale.

Find biggest conversion bottleneck.

Fix it.

22. PHASE 5

JANUARY 2027 — DISTRIBUTION

Expand proven channels.

Potential:

- additional European SEO
- architect partnerships
- landscape designers
- hospitality
- creators
- editorial outreach
- manufacturer co-marketing
- supplier backlinks
- Pinterest scale

Do not enter countries solely because expansion sounds attractive.

Require evidence.

23. PHASE 6

FEBRUARY 2027 — SCALE DECISION

Produce complete six-month review.

Evaluate:

- revenue
- gross profit
- CAC
- AOV
- conversion
- leads
- email
- organic traffic
- social
- outreach
- supplier performance
- product performance

- countries
- channels

Classify every major channel:

SCALE
MAINTAIN
REVISE
STOP

Create March–August 2027 roadmap from actual evidence.

24. KPI SCOREBOARD

Maintain:

growth/KPI-SCOREBOARD.md

Track at minimum:

Commercial

Revenue
Orders
AOV
Gross profit
Gross margin
Refunds
Shipping cost impact

Website

Sessions
Product views
Add-to-cart
Checkout
Conversion rate
Lead conversion

SEO

Organic clicks
Impressions
Average position
Indexed pages
Top landing pages
Non-brand traffic

Social

Content published
Reach
Views
Saves

Profile visits
Website clicks
Qualified leads

Follower count is secondary.

Outreach

Prospects researched
Contacts verified
Emails prepared
Emails approved/sent
Replies
Positive replies
Meetings/project conversations
Quotes
Revenue

Paid

Spend
Clicks
CPC
Qualified sessions
Conversions
CAC
Revenue
Gross profit
ROAS

25. CLAUDE AUTONOMOUS EXECUTION SYSTEM

Claude should run this roadmap 3–4 work cycles per day.

It must NOT blindly execute random roadmap items.

Every run follows the same loop.

26. AUTONOMOUS RUN LOOP

STEP 1 — READ STATE

Read:

AGENTS.md

existing VeldoraHaven memory/context files

ROADMAP.md

STATE.md

GROWTH-ROADMAP.md

growth/GROWTH-STATE.md

latest relevant reports

Never assume project state from conversation memory when repository evidence exists.

STEP 2 — IDENTIFY CURRENT STAGE

Determine:

CURRENT PHASE

CURRENT TASK

LAST COMPLETED TASK

BLOCKERS

DEPENDENCIES

AVAILABLE SAFE WORK

STEP 3 — SELECT ONE HIGH-VALUE TASK

Score candidate tasks:

IMPACT

URGENCY

DEPENDENCY VALUE

REVERSIBILITY
EVIDENCE AVAILABLE
TIME TO COMPLETE

Prefer work that unlocks multiple downstream tasks.

27. EXECUTION PRIORITY

Default order:

P0 — Revenue/security/legal/production blocker

P1 — Product/supplier/conversion blocker

P2 — Acquisition infrastructure

P3 — Content/outreach

P4 — Optimization

P5 — Cosmetic improvements

Never perform P5 work while a relevant P0/P1 blocker remains unless P0/P1 cannot currently progress.

28. AUTONOMY RULE

Claude may autonomously:

- research
- analyze
- audit
- write drafts
- prepare code
- create branches
- run tests
- prepare content
- prepare outreach
- prepare SEO
- analyze analytics
- generate reports
- identify prospects
- prepare product data
- prepare proposed website improvements

Claude must require approval before:

- spending money
 - launching paid ads
 - sending external outreach
 - signing agreements
 - accepting supplier terms
 - changing final commercial policy
 - changing pricing without authorization
 - publishing potentially sensitive claims
 - deleting production data
 - destructive production changes
 - irreversible Shopify actions
-

29. CAVEMAN RULE

Do not delegate work merely because an agent exists.

If the current agent can safely complete the task with sufficient quality and context:

DO IT.

Delegate only when specialist capability materially improves:

- accuracy
 - speed
 - safety
 - domain expertise
 - context efficiency
-

30. AGENT ROUTING

Recommended specialists:

ORCHESTRATOR

Owns:

- prioritization
- dependencies
- roadmap
- state
- routing
- final gate

SHOPIFY / LIQUID

Owns:

- theme
- sections
- PDP
- collections
- technical ecommerce implementation

PRODUCT / COMMERCE

Owns:

- product architecture
- pricing
- supplier data
- bundles
- margins
- product quality

GROWTH

Owns:

- acquisition
- funnels
- CRO
- campaigns
- analytics

SEO / CONTENT

Owns:

- keyword research
- journal
- landing pages
- internal links
- metadata

SOCIAL / CREATIVE

Owns:

- creative concepts
- scripts
- content calendar
- repurposing

OUTREACH

Owns:

- prospecting
 - qualification
 - personalization
 - CRM preparation
 - trade pipeline
-

31. RUN OUTPUT

Every autonomous run must end by updating:

```
growth/GROWTH-STATE.md
```

Format:

DATE/TIME:

PHASE:

TASK:

STATUS:

WORK COMPLETED:

FILES CHANGED:

EVIDENCE:

TESTS/VALIDATION:

BLOCKERS:

NEXT BEST ACTION:

APPROVAL REQUIRED:

32. DAILY OPERATING RHYTHM

Claude may perform approximately four autonomous cycles per day.

Suggested conceptual rhythm:

RUN A — DISCOVERY

Audit data.

Look for:

- blockers
- opportunities
- changes
- missing information
- performance anomalies

RUN B — BUILD

Execute highest-value safe task.

RUN C — DISTRIBUTION

Work on:

- SEO
- content
- outreach preparation
- product distribution
- partnerships

RUN D — REVIEW

Validate day's work.

Update metrics.

Update state.

Select next priority.

The actual task should still be chosen by evidence rather than rigid time slots.

33. ANTI-BUSYWORK RULE

Claude must not create work simply to complete four runs.

If no meaningful safe work exists:

report:

NO HIGH-VALUE AUTONOMOUS TASK AVAILABLE

and state the blocker.

Do not:

- redesign finished components
- rewrite good copy repeatedly
- create duplicate documents
- create speculative features
- generate low-quality SEO pages
- manufacture fake progress

34. EXPERIMENT FRAMEWORK

Every growth experiment must contain:

HYPOTHESIS

Example:

High-intent Auroom Search campaigns can acquire qualified sauna visitors more efficiently than broad outdoor-wellness advertising.

METRIC

Example:

Qualified product sessions / CAC / gross profit.

SUCCESS CRITERIA

Defined before evaluation.

RESULT

Evidence.

DECISION

SCALE

REVISE

STOP

Store experiments under:

growth/experiments/

35. CONTENT DATABASE

Maintain:

growth/content/CONTENT-BACKLOG.md

Each idea:

ID
Channel
Pillar
Topic
Target customer
Hook
CTA
Asset requirement
Status
Performance

Statuses:

IDEA
RESEARCHED
READY
PRODUCED
APPROVED
PUBLISHED
MEASURED
REPURPOSE

36. OUTREACH DATABASE

Maintain:

growth/outreach/OUTREACH-STATE.md

Never count a company as an outreach-ready prospect without sufficient evidence.

Required minimum:

Company
URL
Segment
Country
Fit rationale
Relevant contact
Contact role

Verified contact method or explicit missing-data state
Personalization evidence
Status

37. WEEKLY REVIEW

Once per week Claude produces:

growth/reports/YYYY-WW-GROWTH-REVIEW.md

Containing:

EXECUTIVE SUMMARY

COMMERCIAL PERFORMANCE

WHAT CHANGED

WHAT WORKED

WHAT FAILED

SEO

SOCIAL

OUTREACH

PAID

PRODUCT

SUPPLIERS

RISKS

BLOCKERS

NEXT WEEK

APPROVAL QUEUE

38. MONTHLY REVIEW

At month-end answer:

1. What generated revenue?
2. What generated qualified demand?
3. What increased conversion?
4. Which products received demand?
5. Which content generated intent?
6. Which outreach segments replied?
7. Which channels wasted resources?
8. What is the current bottleneck?
9. What should be scaled?
10. What should stop?

Update roadmap based on evidence.

Do not rewrite historical results.

39. SOURCE-OF-TRUTH RULE

Repository state beats AI memory.

Manufacturer documentation beats assumptions.

Shopify data beats copied spreadsheets for current store state.

Approved pricing policy beats inferred pricing.

Real analytics beats marketing intuition.

Verified emails beat guessed emails.

Actual customer evidence beats fabricated social proof.

40. GROWTH GUARDRAILS

Never:

- fake scarcity
- fake reviews
- fake partnerships
- fake customer counts
- fake discounts
- fake supplier relationships

- guess contact emails
 - mass-publish AI SEO spam
 - publish manufacturer material without appropriate rights
 - silently alter pricing
 - optimize revenue while ignoring margin
 - sacrifice premium positioning for cheap conversion tricks
-

41. FIRST EXECUTION QUEUE

When this roadmap becomes active, Claude should NOT immediately start publishing.

First run:

G0.1 — MERGE AUDIT

Read existing:

ROADMAP.md

STATE.md

AGENTS.md

all relevant current project/memory documents

and this:

GROWTH-ROADMAP.md

Produce:

growth/GROWTH-MERGE-AUDIT.md

Identify:

DUPLICATES

CONFLICTS

DEPENDENCIES

ALREADY COMPLETED WORK

ACTIVE WORK

MISSING WORK

PROPOSED MERGE

Do not modify existing roadmap during this audit.

Second run:

G0.2 — LIVE COMMERCIAL AUDIT

Audit current VeldoraHaven state.

Cover:

Homepage

Navigation

Collections

PDPs

Products

Pricing state

Trust

Partners

Journal

SEO

Analytics configuration where accessible

Social state where accessible

Supplier state from repository evidence

Produce:

growth/BASELINE-2026-09.md

Third run:

G0.3 — KPI BASELINE

Create:

growth/KPI-SCOREBOARD.md

Use real values where available.

Otherwise use:

UNKNOWN — DATA REQUIRED

Never estimate operational KPI values and present them as actual.

Fourth run:

G0.4 — PRIORITY QUEUE

Create:

growth/PRIORITY-QUEUE.md

Rank next 20 executable growth tasks.

Each task:

ID
Phase
Priority
Impact
Effort
Dependencies
Risk
Agent
Approval requirement
Definition of Done

Then select the highest-value unblocked task.

42. DEFINITION OF SUCCESS BY MARCH 1, 2027

The six-month program succeeds if VeldoraHaven has moved from:

premium storefront

to:

measurable premium commerce operation.

Required evidence:

- reliable analytics
- broader credible assortment
- active acquisition channels
- repeatable social system
- functioning SEO system
- trade/outreach pipeline
- CRM/email system
- conversion measurement
- revenue attribution
- gross-profit visibility
- documented growth experiments

- evidence-based next roadmap

The objective is not merely more traffic.

The objective is a repeatable system that turns:

PRODUCT

→ CONTENT

→ DISCOVERY

→ TRUST

→ INTENT

→ PURCHASE / PROJECT

→ GROSS PROFIT

→ CUSTOMER / PARTNER PROOF

→ MORE DISCOVERY.

43. CURRENT PRIMARY OBJECTIVE

Do not redesign VeldoraHaven for the sake of redesigning it.

The next strategic transition is:

BUILD DISTRIBUTION.

Until evidence says otherwise, prioritize:

1. Complete commercial/product foundation
2. Strengthen trust
3. Expand premium assortment
4. Establish measurement
5. Build organic distribution
6. Build B2B distribution
7. Launch high-intent paid acquisition
8. Measure
9. Improve conversion
10. Scale proven channels

END OF GROWTH OPERATING SYSTEM
